# CERTIFICATIONS

## **Cisco Certifications:**

CCNA ITN  
CCNA Cybersecurity Operations  
CCNA Enterprise Networking, Security, and Automation  
CCNA Switching, Routing, and Wireless Essentials

## **Security Certifications:**

Information Security Management Certificate  
Physical Security Risk Assessor (MAI authorized)  
Security Systems Specialist  
IGSU Authorization for Alarm Systems

## **Authorizations and Competencies:**

Fire alarm and signaling systems design  
Fire limitation and extinguishing systems design  
Construction electrical works  
Electronic technology

## **Specializări Tehnologice:**

Microsoft SQL  
Autocad  
Big Data Analysis

## ABOUT US

WE PROVIDE IT INFRASTRUCTURE AND SECURITY SOLUTIONS

**With solid IT experience, we provide complete and customized networking and security solutions for organizations of all sizes.**

Our integrated approach and technical expertise allow us to implement and maintain high-performance IT infrastructures, ensuring your company's success and security.

### SERVICE CATEGORIES:

01. Network Infrastructure
02. Server and Storage Solutions
03. Data Center & Server Room Solutions
04. Enterprise Solutions
05. IT Security
06. Cloud and VPN Solutions
07. Physical Security
08. Equipment Sales and Support
09. Related Services
10. Smart Building Infrastructure
11. Specialized Training

# We implement and optimize high-performance digital infrastructures, built for scalability and maximum operational efficiency

## KEY ADVANTAGES:

- Fast and efficient communication between all departments
- Enhanced company data security
- Business growth scalability
- Optimized application performance
- Reduced downtime

| [contact@netforge.ro](mailto:contact@netforge.ro)

## Network Installation

We provide complete services for designing and implementing network infrastructures, from initial planning to final deployment. Solutions follow the highest industry standards and use cutting-edge technologies for optimal performance.

The technical process includes strategic equipment positioning, professional cable installation, and configuration for robust connectivity. Detailed documentation for each project ensures complete infrastructure visibility and facilitates future scaling.

### Services:

- Design and implementation of new networks
- Existing network expansion
- Cable routing and certification
- Rack and patch panel installation
- Complete technical documentation

## Advanced Routing

We implement advanced routing solutions to optimize data flow and ensure fast, reliable communication. Smart routing protocols automatically adapt to traffic conditions, efficiently distribute load, and maintain service continuity during unexpected interruptions.

Traffic optimization systems prioritize critical applications and eliminate communication bottlenecks and delays. The result is a stable, high-performance network ready for scaling.

### Services:

- BGP and OSPF configuration
- Dynamic routing implementation
- QoS and traffic shapin
- Load balancing and failover
- Routing performance optimization

# NETWORK INFRASTRUCTURE

IT INFRASTRUCTURE AND SECURITY SOLUTIONS

| netforge.ro

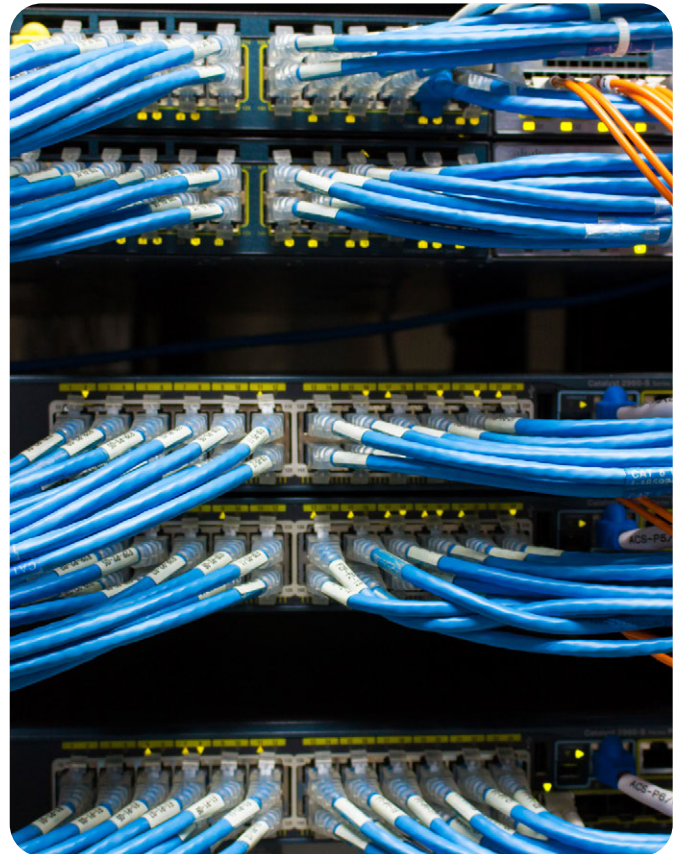

## Network Configuration and Management

We ensure network performance and security through comprehensive configuration and management services. Intelligent data traffic segmentation and advanced monitoring systems enable proactive identification and resolution of potential issues.

Continuous optimization and preventive adjustments maintain infrastructure at peak performance parameters. Management systems provide complete visibility of network status and guarantee efficient and secure operation.

### Services:

- Router and switch configuration
- VLAN implementation
- Network traffic management
- Performance monitoring
- Network optimization

# Complete server and storage infrastructure for efficient data management, optimal collaboration, and guaranteed operational continuity

## KEY ADVANTAGES:

- **Fast and secure data access**
- **Guaranteed data backup and recovery**
- **Efficient team collaboration**
- **Reduced administration costs**
- **Increased service availability**

| [contact@netforge.ro](mailto:contact@netforge.ro)

## Windows Servers

We implement and manage complete Microsoft platforms for efficient communication, secure collaboration, and automated backup of critical data..

The integrated Microsoft infrastructure provides centralized access to collaborative tools, productivity applications, and redundant storage systems, ensuring operational continuity in a secure environment.

### Services:

- Windows Server implementation
- Active Directory and Group Policy
- Exchange and email services
- SharePoint and collaboration
- Backup and disaster recovery

## Linux Servers

We configure robust and secure Linux servers, providing maximum performance for web services, virtualization, and critical process automation.

The Linux infrastructure enables rapid container deployment, efficient resource management, and instant scalability, all optimized for high-availability production environments.

### Services:

- Linux server configuration (Ubuntu, Cloudlinux, RHEL or RHEL-based)
- Web and email services
- Containers and virtualization
- Security and hardening
- Automation and scripting

# SERVER AND STORAGE SOLUTIONS

IT INFRASTRUCTURE AND SECURITY SOLUTIONS

| netforge.ro

## NAS Solutions

(Network Attached Storage)

Professional network storage systems providing fast data access, automatic backup, and secure file sharing across the organization.

Redundant RAID architecture and advanced backup systems ensure data integrity, while centralized management enables granular access control and real-time monitoring.

### Services:

- Professional NAS server implementation
- RAID configuration and redundancy
- Data backup and synchronization
- File sharing and permissions
- Active Directory integration
- Unraid, TrueNAS, and other solutions

# We design and implement modern data centers for uninterrupted functionality and optimal performance of critical systems

## KEY ADVANTAGES:

- Uninterrupted operation of critical systems
- Maximum energy efficiency
- High scalability and flexibility
- Advanced equipment protection
- Optimized resource management

| [contact@netforge.ro](mailto:contact@netforge.ro)

## Design and Implementation

We develop complete data center architecture, integrating space planning with critical cooling and power systems.

Each component is designed and optimized for maximum efficiency and redundancy, creating a controlled environment for optimal IT infrastructure operation.

## Services:

- Needs assessment and design
- Space and infrastructure planning
- Cooling and ventilation systems
- Electrical systems and UPS
- Environmental monitoring (temperature, humidity)

# DATA CENTER & SERVER ROOM SOLUTIONS

IT INFRASTRUCTURE AND SECURITY SOLUTIONS

| netforge.ro

## Equipment and Installation

We implement complete physical infrastructure, integrating modern server, storage, and power management systems.

We use best practices in equipment installation and configuration, guaranteeing maximum performance and availability.

### Services:

- Server racks and accessories
- Servers and storage systems
- UPS and backup systems
- PDU systems and power management
- Structured cabling

## Maintenance and Support

We implement complete physical infrastructure by integrating modern server, storage, and power management systems.

Equipment installation and configuration follows the highest industry standards to ensure maximum availability and optimal performance.

### Services:

- 24/7 monitoring
- Preventive maintenance
- Dedicated technical support
- Upgrades and optimizations
- Warranty management

# We implement complete enterprise solutions, integrating top technologies for high-performance and scalable infrastructures, optimized for strategic growth objectives

## KEY ADVANTAGES:

- Complete system integration
- Simplified centralized administration
- Operational cost optimization
- Increased flexibility and adaptability
- Business development support

| [contact@netforge.ro](mailto:contact@netforge.ro)

## Equipment Configuration

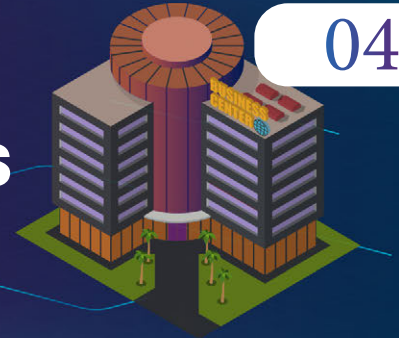

We integrate enterprise equipment from top providers like Fortinet, Cisco, Juniper, and Mikrotek for robust and secure infrastructures.

Unified management solutions enable centralized administration and monitoring of the entire network, providing granular control over all devices and resources.

## Services:

- Fortinet implementation and configuration
- Complete Cisco solutions
- Complete Juniper solutions
- Mikrotek systems
- Unified device management

# ENTERPRISE SOLUTIONS

IT INFRASTRUCTURE AND SECURITY SOLUTIONS

| netforge.ro

## Virtualization

We implement advanced virtualization solutions using industry-leading technologies: Hyper-V, VMware, KVM, and Citrix.

Virtualization optimizes hardware resources, maximizes operational flexibility, and reduces maintenance costs, while providing redundancy and high availability for critical systems.

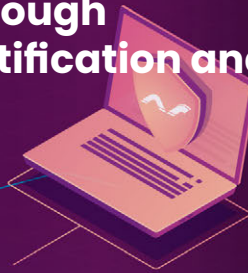

## Services:

- Hyper-V
- VMWARE
- KVM
- Citrix Hypervisor

# We ensure complete protection of digital assets through advanced IT security solutions, with proactive identification and elimination of vulnerabilities

## KEY ADVANTAGES:

- Complete protection against cyber threats
- Compliance with current regulations
- Rapid incident detection and response
- Ensured operational continuity
- Company reputation protection

| [contact@netforge.ro](mailto:contact@netforge.ro)

## Security Assessment

We conduct comprehensive IT infrastructure analyses to identify vulnerabilities and evaluate security risks.

Action plans and detailed reports provide concrete solutions for strengthening security, aligned with industry best practices.

### Services:

- Complete security audit
- Vulnerability analysis
- Security risk assessment
- Detailed reports and recommendations
- Remediation plan

## Penetration Testing

We proactively test your infrastructure security through realistic cyber attack simulations.

We evaluate all critical aspects - from network and web application security to social engineering resistance, providing a clear picture of the actual protection level.

### Services:

- Network infrastructure testing
- Web application security assessment
- Social engineering attack simulation
- Wireless security testing
- Vulnerability identification

# IT SECURITY

IT INFRASTRUCTURE AND SECURITY SOLUTIONS

| netforge.ro

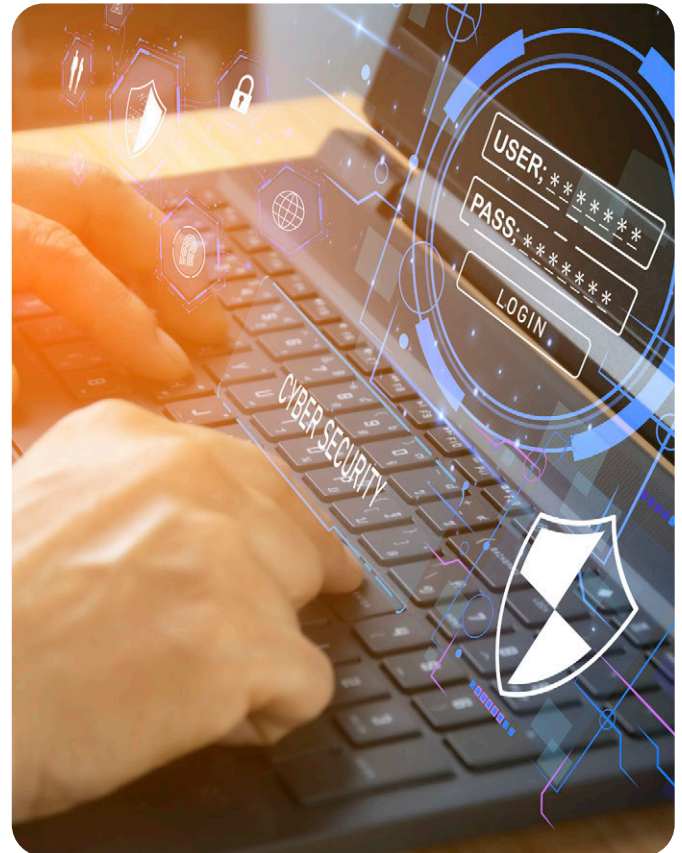

## Cyber Protection

We implement advanced protection measures for safe and uninterrupted IT systems operation.

From server security and DDoS protection to advanced monitoring and rapid incident response, we build a complete digital shield for critical infrastructure.

### Services:

- Server security
- DDoS protection
- Threat monitoring
- Incident response
- Data backup and recovery

# We provide secure connectivity and flexible resource access through advanced cloud and VPN solutions, with guaranteed availability from anywhere

## KEY ADVANTAGES:

- Secure access from anywhere, anytime
- Reduced infrastructure costs
- Instant scalability
- Rapid disaster recovery
- Increased operational flexibility

| [contact@netforge.ro](mailto:contact@netforge.ro)

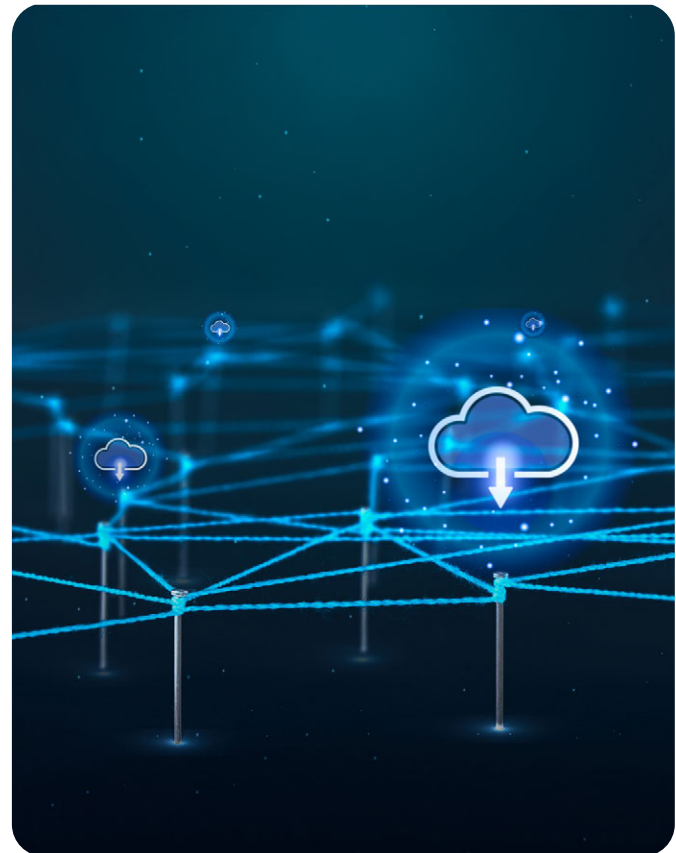

## Cloud Services

We implement robust cloud infrastructures with secure remote access through encrypted VPN connections.

Site-to-site and remote access VPN solutions ensure secure connectivity between locations and complete cloud services integration.

### Services:

- Cloud VPN
- Remote access security
- Site-to-site VPN tunnels
- Cloud services integration
- Bastion server configuration
- DDoS attack protection

# CLOUD & VPN SOLUTIONS

IT INFRASTRUCTURE AND SECURITY SOLUTIONS

| netforge.ro

## Application Security

We provide advanced protection for critical systems, focusing on ERP platforms and accounting solutions.

Access management systems and sensitive data encryption prevent unauthorized access and ensure confidentiality of vital information.

### Services:

- Locally hosted application security
- Nexus ERP security
- SAGA security
- Accounting application protection
- Access management
- Sensitive data encryption
- Remote desktop access via VPN

# We protect spaces and assets through integrated physical security systems, with complete control and permanent access monitoring.

## KEY ADVANTAGES:

- Complete protection of physical assets
- 24/7 space monitoring
- Granular access control
- Rapid incident response
- Integration with existing systems

| [contact@netforge.ro](mailto:contact@netforge.ro)

## Alarm Systems

We design and implement professional alarm systems based on detailed specific risk assessments.

Customized solutions integrate with existing infrastructure, ensuring continuous monitoring and immediate incident alerts.

### Services:

- Risk evaluation and analysis
- Professional system design
- Installation and configuration
- Integration with existing systems
- Periodic maintenance

## Surveillance Systems

We implement complete video surveillance solutions for total visibility and control of secured spaces.

CCTV systems integrate advanced recording technologies with secure remote access, ensuring permanent monitoring and safe archiving.

### Services:

- CCTV system design
- IP/PoE camera installation
- Recording system configuration
- Secure remote access
- Data storage and archiving

# PHYSICAL SECURITY

IT INFRASTRUCTURE AND SECURITY SOLUTIONS

| netforge.ro

## Access Control Systems

We develop intelligent systems for access control and efficient personnel flow management

We integrate high-performance readers and electromagnetic locks with specialized management software for granular access control in all secured areas.

### Services:

- Access control system design
- IReader and electromagnetic lock installation
- Management software configuration
- Integration with alarm system
- Custom cards and tags
- Integration with automatic time tracking systems

# We provide professional IT equipment from top manufacturers, with complete technical support and extended warranty for guaranteed optimal performance.

## KEY ADVANTAGES:

- **Guaranteed professional equipment**
- **Specialized technical support**
- **Reduced maintenance costs**
- **Ensured operational continuity**
- **Optimized ROI for technology investments**

| [contact@netforge.ro](mailto:contact@netforge.ro)

## Equipment Sales

We provide a complete portfolio of enterprise IT equipment selected for maximum performance and reliability.

From network infrastructure and servers to security systems and power solutions, we integrate all essential components for a robust IT infrastructure.

## Services:

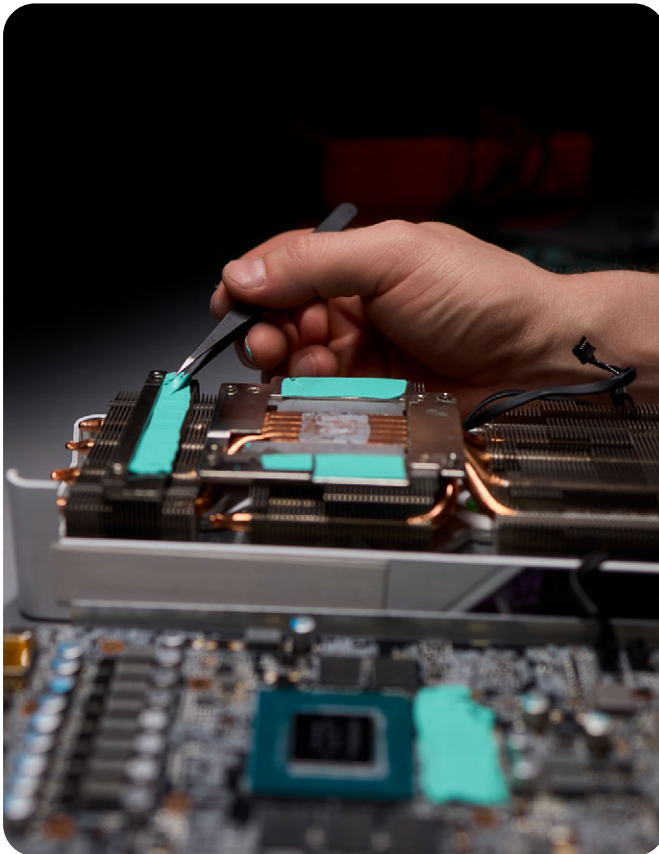

- Networking equipment
- Servers and storage systems
- Server Rack and Server Room
- Security equipment
- UPS and PDU systems
- Accessories and consumables

# EQUIPMENT SALES AND SUPPORT

IT INFRASTRUCTURE AND SECURITY SOLUTIONS

| netforge.ro

## Service and Warranty

We provide professional technical support and complete maintenance services for all equipment sold.

Our extended warranty programs, combined with authorized service and access to original spare parts, minimize downtime and protect your technology investment.

For complex interventions, we offer temporary replacement equipment to ensure operational continuity.

### Services:

- Extended warranty
- Authorized service
- Original spare parts
- Temporary equipment replacement
- Technical consulting

# We provide essential consulting and technical support services for IT infrastructure optimization and ensuring operational continuity

## KEY ADVANTAGES:

- IT investment optimization
- Permanent technical assistance
- Reduced downtime
- Regulatory compliance
- Increased operational efficiency

| [contact@netforge.ro](mailto:contact@netforge.ro)

## IT Consulting

We provide strategic expertise for developing and optimizing your organization's IT infrastructure.

Our specialists guide you in investment planning, security policy implementation, and ensuring compliance with current regulations, including GDPR.

Our recommendations target both operational efficiency and long-term cost optimization.

### Services:

- IT infrastructure planning
- Cost optimization
- Security strategy
- GDPR compliance
- IT policies and procedures

# RELATED SERVICES

IT INFRASTRUCTURE AND SECURITY SOLUTIONS

| netforge.ro

## Technical Support

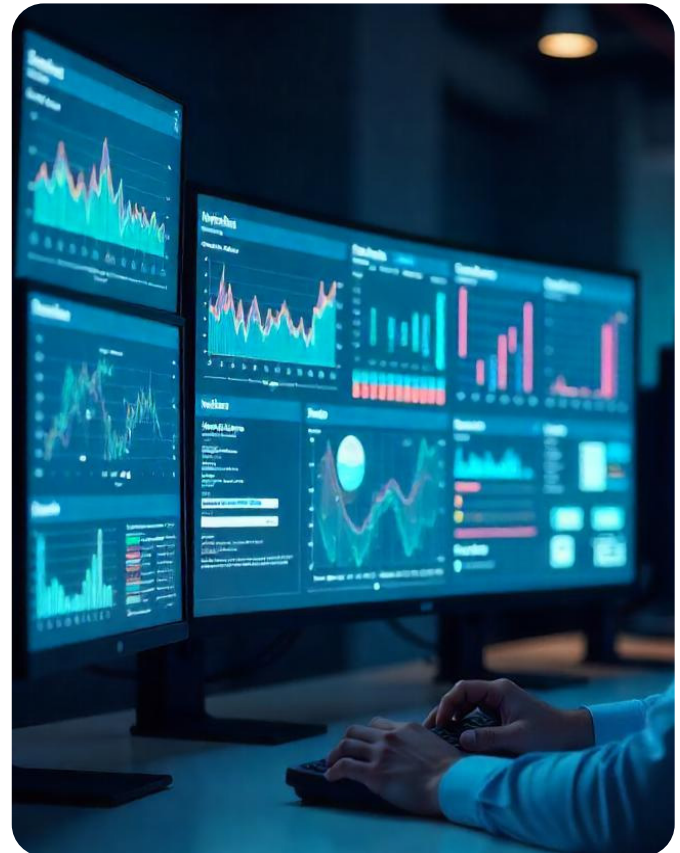

We ensure uninterrupted system operation through complete 24/7 help desk and technical support services.

Our proactive approach, based on continuous monitoring and preventive maintenance, prevents incidents and ensures rapid problem resolution.

We implement robust backup solutions and disaster recovery plans to protect critical data.

### Services:

- 24/7 help desk
- Preventive maintenance
- Emergency interventions
- System monitoring
- Backup and disaster recovery

# SMART BUILDING INFRASTRUCTURE

## We transform traditional buildings into smart spaces

We implement integrated automation solutions that transform buildings into intelligent and efficient ecosystems.

Our **smart building** systems connect and control all essential building elements: from lighting and climate control to security and energy management.

Through centralized control and real-time monitoring, we provide both significant resource savings and a more comfortable, productive work environment.

### Services:

- Building systems integration
- Automation
- Centralized management
- Energy consumption monitoring
- Resource optimization
- Integrated access control
- IoT sensors and telemetry

# SPECIALIZED TRAINING

IT INFRASTRUCTURE AND SECURITY SOLUTIONS

| netforge.ro

## Specialized Training Programs

We offer specialized training programs to maximize IT infrastructure benefits and develop your team's competencies.

### Key advantages:

- Optimal use of implemented systems
- Infrastructure management autonomy
- Reduced adaptation time to new technologies
- Increased operational efficiency
- Internal troubleshooting capability
- IT Investment Value Maximization

### Services:

- Training for networking and security systems
- Training for implemented solutions
- Support in developing internal procedures
- Workflow optimization consulting
- Specialized system operation training
